

openSoftware

Professional support for Free Software

With openSoftware Atos offers extensive support for your installation of Free Software. This comprises compiled, ready to run packages for Linux platforms as well as consulting concerning installation, configuration, usage and troubleshooting.

Future reliability and continuity through Open Source

The Open Source concept guarantees independence, future reliability and continuity for your toolchain. This prevents you from the downsides of proprietary software such as license costs, vendor lock-in and potential backdoors. Furthermore, the access to the source code allows you to have the software adapted to your specific requirements.

Benefits over vendor distributions

- use up to date software versions (on older systems, too!)
- use software which is not supplied by vendor
- unified environment across heterogenous platforms
- non-standard feature extensions, patches, bugfixes
- customer-specific adaptations such as installation paths

We are your support partner for Free Software

For many years we have been providing the role of “contracted support partner” for our customers, which enables them to use Free Software despite restrictive company policies.

The right software for every purpose

openSoftware contains a selection of Free Software packages which have proven their worth for our customers, who are mostly scientists, engineers, developers and system administrators.

Examples

Among many others we provide current versions of:

- Python with numpy/scipy and math libraries (FFTW, OpenBLAS, LAPACK)
- Perl 5 with 200+ CPAN modules as requested by our customers
- Comprehensive Python 3 support plus modules as requested
- GNU Octave with Qt GUI for numeric computations

- Up to date openssh with latest openssl
- GNU Compiler Collection (GCC), CLANG
- authⁿ libraries: openldap, cyrus-sasl, Kerberos
- Latest AI and Data Analytics tools

More packages on request

You can't find your desired software package in our list? Please feel free to contact us!

Stay up to date with the openSoftware web portal

The openSoftware web portal offers you the opportunity to browse through the current package list and download updates between the releases.

Supported platforms

- Red Hat Enterprise Linux 7, 8
- SuSE Linux Enterprise Server 12, 15
- openSUSE
- Debian 8, 9, 10
- Ubuntu LTS 18, 20

further platforms upon request
